

October Examination

MMC – Mining III

Comments of Quality of Answers

- This examination did not have any financial or technical questions, mainly safety and human resources and management questions.
- Answers that achieved the better marks were brief and to the point – i.e.: two line answers achieved the same marks as half a page answers.
- Some questions were written on the answer sheet and the answer then followed – waste of time and marks.
- In answering the question the same answer was given more than once, explaining the answer already given.
- Most answers lacked technique and strategy.
- Evidence of copying answers between two students from North West.
